

## Care to join us

As one of New Zealand's fastest growing major providers of premium residential care, Radius Residential makes the most of every opportunity to enhance the wellbeing, dignity, and independence of our residents. Throughout our 22 facilities nationwide, more than 1300 highly trained staff work hard to look after the physical and emotional needs of our clients, 24 hours a day, every day.

### Facility Manager

You will astutely manage all the staff and resources of the facility while strongly leading and motivating your team to deliver safe, effective, high quality care to our residents.

A born communicator, you will build and sustain useful relationships not only with our residents and their families, but also with a diverse range of important external entities such as government departments, health organisations, and community groups.

You will apply your shrewd business sense and sound financial management skills to the efficient running of the facility under your charge while employing your sales abilities to actively promote our services to the wider community.

Backing up your proven business management, leadership, and organisational skills, you should possess a relevant business, health, or nursing tertiary qualification and recent experience in hospital or rest home care.

In this role you can look forward to working alongside well-qualified and dedicated staff in a workplace where training and professional development are a priority, and where staff and residents enjoy a relaxed, professional, family-oriented environment – apply now!
